ABOUT ME

Final-year Computer Science and Engineering student with a strong foundation in Java, Python, C++, MySQL, PostgreSQL, and Git/GitHub. Passionate about software development and problem-solving, with a strong willingness to learn and adapt to new technologies. A collaborative and responsible team member who is eager to gain practical industry experience and contribute to real-world software projects.

EDUCATION

2022 - 2026

**Bachelor of Engineering (Hons) in
Computer Science and Engineering**

Myanmar Institute of Information Technology
Expected Graduation: 2027

PROJECTS

Personalized Coaching System at Home | Java, JavaFX, MySQL

2024

Built a Java-based desktop application providing structured workout and health coaching routines for users training at home.
Led backend development and designed the MySQL relational database schema to manage user profile data, daily schedules, and activity tracking.

Academic Schedule Optimizer | React, Tailwind CSS, Supabase, Git

2025

Developed a full-stack web application designed to optimize daily study schedules for students based on exam dates and assignment deadlines.
Architected and managed the relational database structure on Supabase to ensure data integrity and efficient schedule calculations.
Collaborated closely with team members as a Full-Stack Developer to integrate frontend UI components with backend APIs seamlessly.

SKILLS

Programming: Java, Python, C++, java script, type script

Database: MySQL, PostgreSQL, Supabase

Tools: Git, GitHub, IntelliJ IDEA, Visual Studio Code, Rstudio

Core Skills: OOP, Data Structures & Algorithms, Database Design, Problem Solving, Data Analytic

Professional Skills: Teamwork, Communication, Adaptability, Quick Learning
